As you are out on our trail system, please remember the following rules:

**Dogs**
- Dogs are only allowed on a select number of trails, see the dashed lines on our trail maps.
- Please remember to pick up after your dog.
- We have several trash cans in and around the Nordic centers. For health and safety, please keep dogs leashed in these areas.
- The Town of Snowmass Village has a leash law; please keep your dog leashed while on the Snowmass Trails.
- Around Aspen on the Ruedi Blvd and the Harris Open Space, please keep your dog under voice control and in your sight.

**Snowshoeing and Walking**
- Walkers are allowed on the two dog trails in Aspen and Snowmass, and also on the Harris Open Space. The Ruedi Trails is another great option for winter walking or snowshoeing. Otherwise we ask that you use all of our other trails with dogs on your feet.
- Snowshoeing is allowed on our groomed trails, but please do not walk on the classic ski trails, and stay to the side of the trail, especially in soft conditions.

**Bikes**
- Fat tire (or road bikes) are not permitted on the Nordic ski trails system, with the exception that the Ruedi Trail and the Harris Open Space.

**Private Property**
- Many of our trails cross private property, and we are grateful for the support of local homeowners. Staying off trail preserves our access to ski, so please stay on the groomed trail, especially on the Ruedi Trail.

**Motorized Vehicles**
- No motorized vehicles are allowed on the trail system.
About our trail system:

The Aspen Snowmass Nordic Ski Trail System is the largest free trail system in the country! This is all made possible with the state-approved funding of the Pitkin County Open Space and Trails Program, and a long history of community-supported cross-country skiing in the upper Roaring Fork Valley.

The trail system has grown and changed over the years, and now we are proud to connect the communities of Aspen, Snowmass Village, and Basalt with an integrated system of trails. We strive to maintain perfect trails for both skiers and snowshoers to enjoy and experience. Our system hosts a full-service Nordic Center for rentals, lessons, and equipment. Stop in for recommendations on the best trail for you or to help you design the perfect route for your day’s skiing.

You’ll notice that each of our trails has a number. These numbers ranging in zones (10, 20, 30, etc.) are the main loop trails for a given area. The little side trails and connections all have numbers too. These numbers should help you find your way around our system, and connect from one system of trails to the next.

Visit www.aspenloft.com for up-to-date trail conditions and grooming reports.

LEGEND:
- Nordic Ski Trail (green trail, low intensity)
- Multi-Use Trail (blue, snowmobile or dog friendly)
